Description			
jcom.parameter doesn't accept the ramp message. If you send a value with the ramp message and a time for the ramp, the jcom.parameter won't send anything, neither the ramp nor the value.			

History

- Status changed from New to Resolved

The jcom.parameter stop the ramp each time a new value comes from any client. So in the model patch the gui of a jcom.parameter needs to be updated using a [prepend set] otherwise the gui output the value and so stop the ramp.

#2 - 2011-07-21 11:40 pm - Renaud Rubiano

ok, I've removed the connection between the gui and the jcom.parameter... ramp is working now, thank you for enlarge my jcom.knowledge...
